

INFORMATION TECHNOLOGY**Free Catalan language software**

The public agency responsible for Catalan language standardisation in Barcelona will distribute software for free in Catalan, called CATix 1.0, to pupils in 22 language schools. The pack includes an operating system and free software, and contains 1,200 applications, including Open Office 1.1.1, a search engine called Mozilla 1.6 and servers to watch TV on, listen to music, design websites, create animation or touch up photographs, all in Catalan.
